

## VS Code Extensions

---

To install VS Code extensions, follow these simple steps:

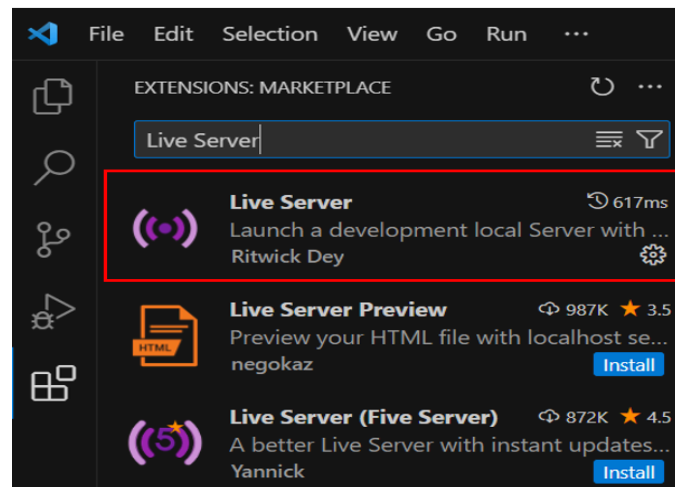

### 1. Live Server:

- a. Open Visual Studio Code:
  - Launch VS Code on your computer.
- b. Go to Extensions:
  - Click on the Extensions icon in the Activity Bar on the side of the window or use the shortcut Ctrl + Shift + X.

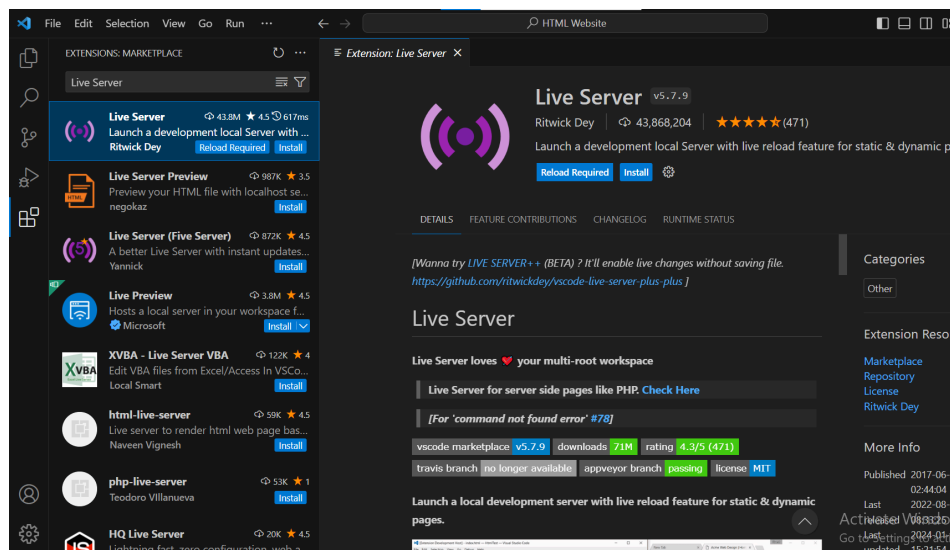

### c. Search for Live Server:

- In the Extensions view, search for "Live Server" in the search bar.

### d. Install Live Server:

- Find the "Live Server" extension in the search results.
- Click the "Install" button next to the extension.

### e- Start Live Server:

- Open an HTML file in your project.
- Click on the "Go Live" option available down below to start the Live server.
- This will launch a live development server, and your default browser will open with the live version of your page.

## 2. Install Prettier Extension:

a. Go to Extensions:

- Click on the Extensions icon in the Activity Bar on the side of the window or use the shortcut Ctrl + Shift + X.

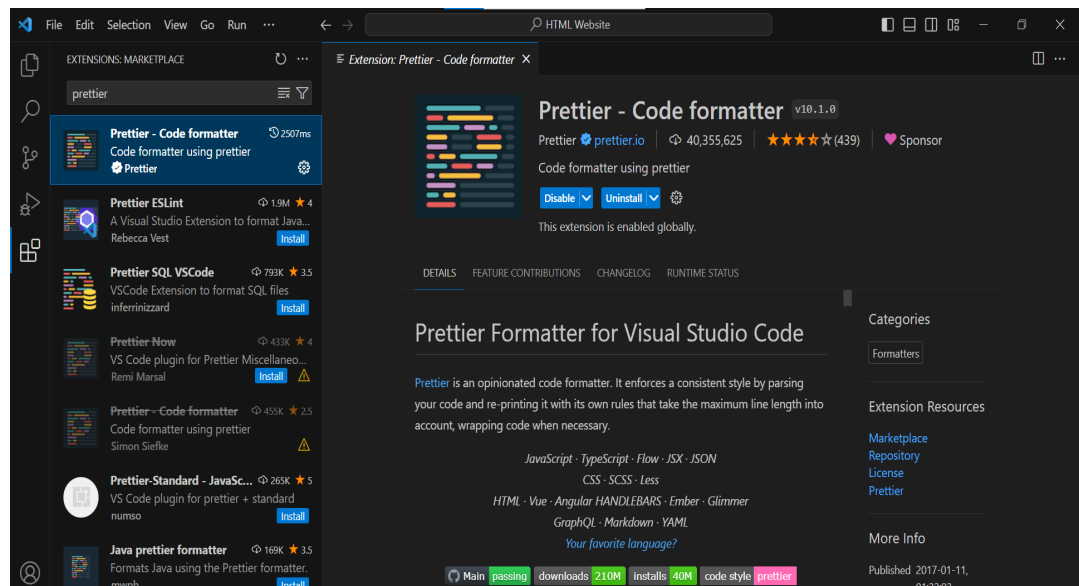

b. Search for Prettier:

- In the Extensions view, search for "Prettier" in the search bar.

c. Install Prettier:

- Find the "Prettier - Code formatter" extension in the search results.

- Click the "Install" button next to the extension.

#### d. Format Code with Prettier:

- Open any HTML file Right-click and select "Format Document" or use the shortcut Shift + Alt + F.
- Prettier will format your code according to its rules.

If prompted to choose a formatter, select "Prettier".

**Now, you have both the Live Server and Prettier extensions installed and configured in Visual Studio Code.**
